

AMAN KUMAR PRAJAPATI

Data Analyst — Business Analyst — MIS / Reporting Analyst

Mumbai, Maharashtra, India — +91 9987189391 — prajapatiaman98@gmail.com
LinkedIn — GitHub

PROFESSIONAL SUMMARY

B.Sc. Information Technology graduate from the University of Mumbai with an **8.18/10.0 CGPA** and hands-on experience in **data analysis, reporting, dashboard development, data validation, predictive analytics, and process automation**. Proficient in **Advanced Excel, SQL, Power BI, DAX, Python, Pandas, and NumPy**, with practical experience analyzing **40,000+ records**, developing KPI dashboards, performing exploratory and statistical analysis, and building predictive models. Strong ability to identify trends, patterns, anomalies, and performance indicators and translate analytical findings into actionable business insights and data-driven decisions.

TECHNICAL SKILLS

Data Analytics: Data Cleaning, Data Validation, Data Preprocessing, Exploratory Data Analysis (EDA), Feature Engineering, Statistical Analysis, Quantitative Analysis, Trend & Pattern Analysis

Business & Reporting: KPI Analysis, MIS Reporting, Performance Analysis, Operational Analysis, Business Intelligence, Decision Support, Analytical Reporting, Process Improvement

BI & Visualization: Power BI, DAX, Power Query, Excel, Dashboard Development, Data Visualization, KPI Reporting

Programming & Databases: Python, SQL, Pandas, NumPy, Matplotlib, MySQL

Machine Learning: Regression, Classification, Random Forest, Logistic Regression, SVM, Predictive Modeling, Risk Scoring, Model Evaluation

Tools: Git, GitHub, Jupyter Notebook, Streamlit, Google Sheets, Postman

INTERNSHIP EXPERIENCE

AI & ML Intern — Edunet Foundation — AICTE Supported

June 2025 – August 2025

- Collected, cleaned, validated, and analyzed structured datasets using **Python, Pandas, NumPy, and statistical techniques** to generate actionable analytical insights.
- Performed **data preprocessing, feature engineering, validation, and error analysis** to improve data quality, consistency, and reliability.
- Developed an **Agricultural Decision Support System** using **Naive Bayes and Random Forest**, achieving **94%+ prediction accuracy**.
- Designed analytical logic using **N-P-K and pH parameters** to generate data-driven recommendations and support quantitative decision-making.
- Built an interactive **Streamlit dashboard** to present analytical results, trends, and recommendations.
- Tested multiple input scenarios, including boundary and edge cases, to validate business logic and improve system reliability.

PROJECTS

India Crime Analytics & Predictive Modeling System

Python — SQL — Power BI

- Analyzed **40,000+ records** to identify trends, patterns, anomalies, performance indicators, and operational insights.
- Performed **data cleaning, validation, EDA, feature analysis, and preprocessing** to improve data quality and identify meaningful relationships.
- Used **SQL and Python** to organize, transform, analyze, and evaluate datasets for analytical reporting and decision support.
- Developed a regression model achieving **$R^2 = 0.81$** for predicting investigation timelines.
- Evaluated model performance using appropriate **MAE, RMSE, and classification metrics** and interpreted results for analytical decision-making.
- Developed analytical visualizations and KPI reporting to communicate findings effectively.

HR Attrition Predictive Analytics & Strategy Dashboard

Python — Power BI — Excel — DAX

- Analyzed employee data to identify **attrition trends, risk factors, performance indicators, and workforce patterns**.
- Built predictive models using **SVM, Logistic Regression, and Random Forest**, achieving approximately **90% accuracy**.
- Developed an automated **risk-scoring pipeline** to identify employees with higher potential attrition risk.
- Built a **Power BI dashboard** using KPIs, DAX, filters, and visual analytics for monitoring and reporting.
- Identified key attrition drivers including **overtime, promotion stagnation, and compensation-related factors**.
- Used **Excel, Power BI, and DAX** to transform analytical results into actionable insights for data-driven decision-making.

FMCG Sales Analytics & Sales Tracking System JavaScript — HTML — CSS — Google Sheets API

- Developed a sales management and analytics application to streamline **sales data collection, processing, tracking, and reporting**.
- Implemented **product-wise sales entry, automated calculations, dashboard reporting, administrative workflows, and data storage**.
- Developed reporting functionality to monitor **sales performance, trends, and transaction-level insights**.
- Implemented **input validation, error handling, data processing, and CSV export** to improve reporting accuracy and reduce manual effort.

EDUCATION

B.Sc. Information Technology — University of Mumbai **2026**
CGPA: 8.18/10.0

Relevant Coursework: **Data Analytics, Statistics, Business Intelligence, Operations Research, Database Management Systems, Machine Learning, Data Structures, Software Engineering**

CERTIFICATIONS & ACHIEVEMENTS

- **TCS Certified — Data Analytics**
- **AI & ML Internship — AICTE Supported**
- **8.18/10.0 CGPA**
